## Career Objective

Senior Backend Engineer (PHP/Laravel) with 7+ years of experience designing scalable, multi-tenant, and high-performance systems. Proven expertise in optimizing backend services, architecting modular applications, and leading development teams. Experienced in AWS, CI/CD pipelines, and real-time systems.

## Skills

**Core Skills**

- Backend: PHP, Laravel, REST API
- Frontend: JavaScript, React, jQuery
- Database: MySQL, MongoDB, Query Optimization
- DevOps: AWS (EC2, S3, RDS), DigitalOcean, CI/CD (GitHub Actions)
- Realtime: WebSocket, Live Chat, Notifications
- Architecture: Multi-tenant systems, scalable applications

**AI-Assisted Development**

- GitHub Copilot, Cursor, Antigravity
- Prompt engineering for code generation and debugging
- Automated code scaffolding, refactoring, and test generation
- Accelerated development workflows and reduced delivery time

## Experience

### 6amTech

**Dhaka, Bangladesh**

***Senior Software Engineer***

*March 2025 - March 2026*

- Led development of a multi-vendor eCommerce platform
- Led development of an **ERP**
- Designed scalable backend architecture
- Improved performance and ensured system reliability

### RetinaSoft

**Dhaka, Bangladesh**

***Software Engineer***

*October 2020 - February 2025*

- Built **ERP** system (**HRM**, **Payroll**, **Accounting**)
- Implemented **real-time chat, notifications** and **Video calling**
- Optimized **server** and **database queries** to improve performance
- Developed and maintained a full-featured **Accounting Management System**
- Handled high traffic users efficiently

### IGL Web Ltd

**Dhaka, Bangladesh**

***Web Developer (Backend)***

*July 2018 - July 2020*

- Migrated legacy PHP systems to Laravel
- Worked on SMS and travel management systems

## Feature Projects

**6amMart** ***(Laravel, MySQL)*** Codecanyon

- 6amMart is a multi-purpose business solution allowing businesses to operate with various modules, unlimited vendors, and centralized products.
- Improved performance through query optimization and efficient database design

**AjaxERP** ***(Laravel, MySQL)*** https://staging.ajaxtradingcorp.com

- Offline-first ERP system with local network sync
- Implemented data synchronization strategy ensuring consistency
- Modules: HRM, Payroll, Accounting

**Alhisab** ***(Laravel, MySQL)*** *https://web.alhisab.app*

- Built a scalable accounting system supporting single and double-entry transactions
- Developed core modules: ledger, journal, reporting, and financial management
- Optimized complex queries for faster financial reporting

**Rebusel** ***(Laravel, MySQL)*** *https://staging.rebusel.com*

- Multi-vendor eCommerce platform with **live chat** + **video calling**
- Integrated map-based product discovery

**GpsFreelancer** ***(Laravel, MySQL)***

- Marketplace platform supporting service-based hiring
- Handled high traffic users smoothly.

## Education

**Barguna Polytechnic Institute** **Barguna, Barishal, Bangladesh**
*Diploma in Computer Technology* *July 2013 - June 2017*
**CGPA: 3.41 / 4.00**

**Mahimagonj High School, Gobindogonj** **Gaibandha, Bangladesh**
*Secondary School Certificate* *2013*
**GPA: 4.44 / 5.00**
